

Make Your Life Easier™
WATER TREATMENT SINCE 1978

RSI CHEMICAL PROGRAMS

Precision treatment. Built around your water.

The right treatment decision starts with the system in front of you.

Concept imagery; not a photograph of RSI equipment or a customer site.

A considered program for a demanding operation.

RSI evaluates the equipment and incoming water before recommending chemistry. Treatment goals and environmental impact inform the choice, so the program begins with the needs of your facility.

Understand the water

Start with incoming water quality and operating conditions.

Match the treatment

Select chemistry for the system and the treatment goal.

Review the result

Use testing and operating information to guide the discussion.
