

ALGAE CONTROL · NO CHEMICALS

Cooling Tower Balls™

A floating cover that controls algae by simply blocking sunlight.

WHAT RAMPANT ALGAE COSTS YOU

Headaches, cost and labor dealing with algae and biological issues.

Health concerns from towers with rampant biological growth.

Block the sunlight and it does not grow.

WHAT YOU GET

- ✓ Controls algae by blocking sunlight
- ✓ Sump heaters run less in cold weather
- ✓ HDPE meets FDA guidelines for food contact
- ✓ UV inhibitor gives 10+ years service life
- ✓ Made in USA — 100% recyclable
- ✓ Saves energy — cooler sump water in warm weather
- ✓ Safe for water and food contact
- ✓ Balls rise and lower with the water level
- ✓ Maintenance free — easy installation
- ✓ RSI is the originator, not a copy

SIZING — ABOUT 10 BALLS PER SQUARE FOOT OF WATER SURFACE

5' x 10' sump	500 balls	10' x 10' sump	1,000 balls
100' x 50' pond	50,000 balls	Extra balls	start a second layer

Free Evaluation of Your System

Over 3 million RSI floating balls are in use. Some in the Florida and Caribbean sun are past two decades and still working.
