

Make Your Life Easier™
WATER TREATMENT SINCE 1978

RSI ECOLOGY CELL™

Select the components. Design the program.

RSI selects a combination of six program elements following the site evaluation.

Concept imagery; not a photograph of RSI equipment or a customer site.

PROGRAM ARCHITECTURE / COMPONENTS ARE SITE-SPECIFIC

CONSIDERATION	APPLICATION
Treatment + filtration	Ecology Cell anodes / side-stream High Efficiency Filtration
Growth-control tools	UV treatment / Cooling Tower Balls
Monitoring + maintenance	Remote conductivity control / scheduled mechanical cleaning
Survey inputs	Tower size or tonnage / water source / primary challenges

Suitability, microbial control and discharge requirements require site evaluation. UV treatment does not leave a distribution-system disinfectant residual.

Define the site constraints and desired operating outcomes with RSI before selecting the components.

RSI product details | RSI: Ecology Cell / CDC: Tower care / EPA: UV

Request a free survey and custom quote.

Send tower size, water source and your primary treatment challenge.
