

RSI ECOLOGY CELL™

Think beyond a single treatment.

A custom nonchemical program for applications where an alternative approach is preferred.

Concept imagery • Illustrative, not RSI equipment or a customer site.

SIX COMPONENTS. SELECTED FOR THE SYSTEM.

RSI combines physical treatment, monitoring and maintenance around the site. Begin with a survey of the actual application.

01 Proprietary anodes

02 Side-stream filtration

03 UV treatment

04 Cooling Tower Balls

05 Conductivity control

06 Mechanical cleaning

Final configuration is site-specific. UV provides no downstream disinfectant residual.

Program components: RSI Ecology Cell. UV context: EPA UV toolkit; CDC water.
