

RSI HIGH EFFICIENCY FILTER

Give suspended solids an exit.

Side-stream bag filtration adds a practical removal step to your water-treatment program.

Concept imagery • Illustrative, not RSI equipment or a customer site.

CHOOSE THE FLOW. CONFIRM THE APPLICATION.

RSI pairs a GRUNDFOS pump with an EATON stainless housing. Bag options span 50 to 0.5 microns.

HEF-100		100 GPM / 2-inch connections
HEF-150		150 GPM / 3-inch connections
HEF-200		200 GPM / 3-inch connections

No backwash or floor drain required. Removes suspended solids, not dissolved minerals. Bag rating is not a certified system capture curve.

Specifications: supplied RSI flyer. Filtration context: DOE; CDC tower guidance.
