

Make Your Life Easier™
WATER TREATMENT SINCE 1978

RSI SOLID CHEMISTRY

From solid concentrate to controlled feed.

A delivery-format decision built around the required water treatment.

Concept imagery; not a photograph of RSI equipment or a customer site.

IMPLEMENTATION SEQUENCE

CONSIDERATION	APPLICATION
01 / Select	Match the chemistry to the equipment, water and treatment goal.
02 / Plan	Confirm equipment, utilities, storage and installation needs.
03 / Apply	Dissolve and feed the prepared treatment solution as specified.
04 / Review	Compare operating requirements and treatment results.

Solid concentrate and prepared solution still require product-specific handling, PPE and SDS review. Freight, space and labor benefits are application-dependent.

Bring the current chemical program and handling process to the comparison with RSI.
