

RSI SOLID CHEMISTRY

A compact start. A considered program.

Solid concentrate is dissolved on site, then fed as a treatment solution.

Concept imagery • Illustrative, not RSI equipment or a customer site.

RETHINK THE DELIVERY FORMAT

Discuss storage, handling and freight requirements with RSI for cooling towers, boilers and closed loops.

01 STORE

Solid concentrate

→ 02 DISSOLVE

RSI dissolving equipment

→ 03 FEED

Prepared treatment solution

Follow product SDS, PPE and handling requirements for solids and prepared solutions.

Delivery format and applications: RSI Solid Chemistry and supplied RSI flyer.

Explore a solid-chemistry transition.

Review your application, storage and handling needs with RSI.
