

Make Your Life Easier™
WATER TREATMENT SINCE 1978

RSI WATER SOFTENERS

Manage hardness. Protect heat transfer.

Address calcium and magnesium before they become a scale-control challenge.

Concept imagery; not a photograph of RSI equipment or a customer site.

A treatment decision upstream of the equipment.

Ion-exchange softening removes calcium and magnesium hardness from makeup water. Where hardness limits tower cycles, softening may expand the operating range. RSI sizes the recommendation to your demand.

Water quality

Start with the hardness of the incoming water.

Operating fit

Match the selection to daily demand and peak flow.

Wholesale quote

Request a tailored equipment recommendation from RSI.
