

Make Your Life Easier™
WATER TREATMENT SINCE 1978

WHY WATER TREATMENT?

Protect the investment. Start with the water.

A water program should reflect the value of the equipment it serves.

Concept imagery; not a photograph of RSI equipment or a customer site.

Equipment-specific care. A relationship earned monthly.

RSI begins with your equipment and incoming water quality to recommend a treatment program for your operation. Put corrosion, scale and biological control into one considered conversation.

Asset protection

Address the water conditions that challenge your equipment.

Operating performance

Keep scale and deposits in the treatment conversation.

Accountable service

Month-to-month service keeps the relationship focused on results.
