

Make Your Life Easier™
WATER TREATMENT SINCE 1978

WHY WATER TREATMENT?

Four priorities. One coordinated program.

Match the treatment priorities to the system, its water and its operating duty.

Concept imagery; not a photograph of RSI equipment or a customer site.

THE TREATMENT PRIORITIES

CONSIDERATION	APPLICATION
Corrosion	Evaluate water chemistry and system metallurgy.
Scale	Control mineral concentration and deposit formation.
Bacteria	Manage microbial growth within a water management program.
Algae	Address light exposure and growth on exposed surfaces.

Cleaning, sediment removal and monitoring also matter. The mix of controls depends on the equipment and operating conditions.

Bring the equipment list, water source and recent treatment history to the first discussion.

RSI product details | DOE: Filtration / CDC: Tower care

Month to month. Service that earns the relationship.

Talk to RSI about your equipment, water source and priorities.
