

ALGAE CONTROL · ZERO CHEMICALS

Cooling Tower Balls™

Algae needs sunlight. Cover the water and it has none.

WHAT ALGAE ACTUALLY COSTS

The labor, the cost and the headaches of fighting biological growth in a tower, season after season.

The health concerns that come with a tower nobody can keep clean.

No sunlight, no algae. It is that direct.

WHAT THE BALLS DO

- ✓ Block sunlight, so algae cannot grow
- ✓ Sump heaters run less in cold weather
- ✓ Rise and fall with the water level
- ✓ Maintenance free, easy to install
- ✓ Cooler sump water in hot weather
- ✓ HDPE meets FDA food-contact guidelines
- ✓ UV inhibitor: 10+ years of service
- ✓ Made in USA, 100% recyclable, the original

HOW MANY DO YOU NEED

length × width × 10

About ten balls per square foot of water surface covers it. Order extra and they start a second layer.

5' × 10' sump
50 sq ft
500 balls

10' × 10' sump
100 sq ft
1,000 balls

100' × 50' pond
5,000 sq ft
50,000 balls

Free Evaluation of Your System

More than 3 million RSI floating balls are in service. Some in the Florida and Caribbean sun have passed twenty years and are still working.
