

SAFE & SUSTAINABLE

RSI Solid Chemistry

The same proven treatment, manufactured as a solid concentrate.
Nothing to spill.

WHAT LIQUID COSTS YOU

Drums that are heavy, bulky, and awkward to get to the application site.

Splash and spill exposure every time somebody handles them.

Solid removes both.

WHAT YOU GET INSTEAD

- ✓ Nothing to spill or splash
- ✓ Small storage footprint
- ✓ Removes the liability entirely
- ✓ Light and easy to handle
- ✓ Simple to ship and store
- ✓ Potential LEED credits

Proven chemical combinations are manufactured into a solid concentrate, shipped in a low carbon footprint profile, and applied on site with patented dissolving equipment. Cooling towers, boilers and closed loop systems all get the benefit of a well-run program.

Create a Safer Environment

Ask us what switching would look like on your system — and what it would save in freight and storage.
