

TOWER MAKEUP · WHOLESALE

RSI Water Softeners

Remove the hardness before it becomes scale.

WHY THE TOWER IS WHERE IT MATTERS

As cycles of concentration climb, the hardness in the makeup climbs with them, until it comes out as scale.

A cooling tower is often the largest single water user in the building.

Soften the makeup and the scale never forms.

WHAT SOFTENED MAKEUP CHANGES

- ✓ Scale eliminated at the source
- ✓ More than 40% less bleed
- ✓ Water heaters and fixtures benefit too
- ✓ Over 25% less total water use
- ✓ Competitive wholesale pricing
- ✓ Efficiency gains across the facility

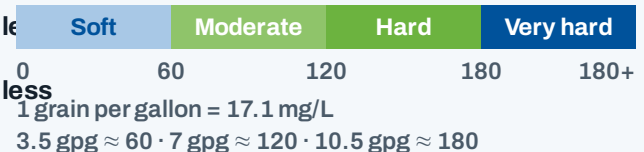

THE NUMBERS, AND WHAT WE NEED FROM YOU

RSI-stated results with softened makeup

Total water use  over 25% less

Bleed  over 40% less

City water hardness, mg/L as CaCO₃ (USGS bands)

For a quote, send: average makeup use (gallons per day), city water hardness (ppm or grains), and peak makeup flow (GPM) or your tower or chiller tonnage.

Free, No-Obligation Quote

Send the figures above and a tailored wholesale quote comes back promptly.
